## Forida Credit Union Profile

## Year-End 2019

CUNA Economics \& Statistics

## A Strong Finish...

The U.S. economy maintained momentum in the fourth quarter as the movement in U.S.China trade negotiations and an accommodative Federal Reserve helped to push equity markets 8.5 percent higher.

The economy grew at a 2.1 percent seasonally adjusted annual rate in the fourth quarter - exactly matching the third quarter result and helping to lift full-year growth to 2.3 percent (which was marginally lower than the 2.9 percent advance experienced in 2018).

Overall, U.S. employment increased by 630,000 which was the largest quarterly increase in the year and the unemployment rate was unchanged at a 50-year low of 3.5 percent compared to the September 2019 level. In Florida, total employment grew by a total of 47,800 in the fourth quarter and the unemployment rate rose to 2.9 percent throughout the period.

Consumer sentiment steadily increased throughout the quarter as the jobs outlook improved. Healthy labor markets pushed personal income up at a 2.9 percent annualized rate in the fourth quarter and the increase was 3.6 percent over the year.

Higher incomes helped to buoy retail sales, which slowed compared to the third quarter results but still increased at a 0.6 percent rate ( 2.4 percent annualized) in the three-month period.

New home sales declined marginally in the quarter, but sales of existing homes increased at an annualized pace of nearly 9 percent in the period. Nationally, home prices increased at an annualized 3.4 percent rate in the quarter. In Florida, home price

increases lagged marginally with a 3.9 percent gain in the three-month period.
The Federal Reserve lowered its federal funds target by 25 basis points in October and the effective federal funds rate finished the year at 1.55 percent - roughly 75 basis points lower than its reading at the start of the year. The ten-year Treasury yield increased by 24 basispoints during the three-month period and finished the year at 1.92 percent. The yield curve was inverted at the start of the quarter but the spread between the Fed's overnight benchmark interest rate and the 10-year Treasury yield started and ended the year at roughly 0.40 percent.

In all, the fourth quarter was a generally favorable operating environment for U.S. credit unions.

Collectively, the Florida's member-owned, not-for-profit depositories reported healthy membership and loan growth, high asset quality, strong earnings, and high net worth ratios in the fourth quarter of 2019. Capital ratios remain near record highs.

Florida credit unions reported a 1.7 percent increase in total memberships in the fourth quarter of 2019. The full-year increase was 4.9 percent, which is roughly 4.5 times faster than Florida population growth. When compared to previous calendar-year results the 2019 change represents the fastest 12-month gain since 2016. In total, credit unions now report 6125.7 thousand memberships - equal to roughly 28 percent of the Florida population.

Florida credit union loan portfolios grew by 3.9 percent in the fourth quarter - a 15.6 percent annualized pace. That's faster than the 3.0 percent third-quarter result and the 2.4 percent year-ago increase. Year-over-year loan growth came in at 11.2 percent.

Looking forward, expect very weak loan portfolio growth in the first quarter against a backdrop of typical seasonal weakness and the growing COVID-19 crisis. CUNA economists expect loan growth to
 decelerate from an annual 6.5 percent pace in 2019 to just 3.5 percent in 2020. We assume that by July the disease will no longer be active in most of the United States - a presumption consistent with a mid-March report by virologists associated with the Global Virus Network and foresee a modest rebound to 5.0 percent loan growth in 2021.

## Florida Credit Union Profile

## Year-End 2019

Looking at fourth quarter growth within the seven broad portfolios tracked on Florida credit union call reports we find commercial loans led the way with a 17.8 percent quarterly increase, though first mortgages (+9.9 percent) and unsecured personal loans (+4.4 percent) also increased at healthy rates.

Credit union savings growth was unusually strong in the fourth quarter - reflected in a 3.2 percent increase in balances (a 12.8 percent annualized gain). That compares to a 1.5 percent increase in the third quarter and a 1.3 percent increase in the fourth quarter of 2018. Certificates increased at a 6.8 percent (unannualized) pace in the fourth quarter while share drafts were up 5.5 percent. Money market shares increased by 3.7 percent in the three-month period. Against a backdrop of steeply declining equity markets and anxiety related to the global COVID-19 pandemic, CUNA's baseline forecast has credit union savings expanding quickly with total balances expected to increase by 12 percent in 2020 and by 8 percent in 2021.

The Florida aggregate loan-to-savings ratio finished the year at 82.7 percent. The yearend reading is lower than the 83.6 percent cyclical high reported at year-end 2018 and will likely dip further as very strong savings growth will persist. Nationally, the credit union loan-to-savings ratio is likely to finish 2020 at about 78 percent and is apt to
 decline further in 2021.

Asset quality remained strong in the fourth quarter. Florida credit union loan delinquency rates held steady with the aggregate, starting and finishing the quarter at 0.50 percent. The net chargeoff rate increased from 0.52 percent in the third quarter to 0.61 percent in the fourth quarter of 2019. Bankruptcies also held steady, with bankruptcies per thousand credit union members remaining unchanged at 1.4 in both 2018 and 2019. Big increases in bankruptcy filings and a corresponding erosion in credit union asset quality will be obvious in the first half of 2020 as job losses balloon.

Overall, Florida credit unions reported annualized ROA (net income as a percentage of average assets) totaling 0.88 percent in the fourth quarter - a healthy level, but down from 0.99 percent in the third quarter. Slowing loan growth and lower market interest rates were to blame for the modest decline though higher operating
 expenses and higher funding costs also were obvious. Still, Florida full-year credit union

## Florida Credit Union Profile

earnings came in at 1.00 percent in 2019 - their highest post-recession reading. Overall, Florida credit union earnings averaged 0.73 percent over the past ten years.

The aggregate credit union net worth ratio held steady and finished the year at 10.8 percent. The current reading is a post-recession high and over 98 percent of Florida credit unions are well capitalized with net worth ratios over 7 percent. Credit unions are in generally good financial shape entering the current economic crisis and most should have the wherewithal to continue to serve in meaningful ways as members struggle to make it through the growing health care and financial challenges.

## ...But a Gloomy and Uncertain Outlook

There is now little doubt that the U.S. economy has entered a recession as a result of the novel Coronavirus (COVID-19). Social distancing, event cancellation, school closures and "stay at home" orders-all of which are critical to controlling the public health crisis-have dramatically reduced normal economic activity. The most immediately-impacted industriesrecreation, transportation, and food services and accommodation-add up to $\$ 2.1$ trillion in annual spending ( 14 percent of total consumption spending).

Although the crisis is still unfolding, CUNA economists forecast a baseline 1.0 percent contraction in annualized real GDP in the first quarter of 2020 followed by a significant decline of 12.0 percent in the second quarter.

Assuming the coronavirus peaks in the second quarter and the U.S. begins to gradually resume economic activity shortly thereafter, we expect economic growth to bounce back slightly in the third and fourth quarters by 1.0 percent and 3.0 percent, respectively (annualized).

Overall, growth is likely to remain muted throughout 2020 as supply chains rebuild, many businesses are forced to close indefinitely, and consumers remain cautious. This, we believe, will lead to an overall annual decline in real GDP of 2.25 percent in the year.

Under our baseline assumptions, economic growth will rebound relatively quickly with production and service-sector activity resuming, and pent up consumer demand driving growth. Moreover, unlike the experience in the 2007-2009 financial crisis, financial markets are likely to remain intact which-combined with historically low interest rates-will further stimulate the economy. We therefore expect relatively strong growth of 3.0 percent in 2021 followed by a gradual return to the long-term sustainable growth rate of approximately 1.8 percent by 2024.
