Job Title	Infrastructure Engineer III
Short Description	We are seeking an experienced Infrastructure Engineer III to join our Information Technology team. As an Infrastructure Engineer III, you will play a crucial role in the design, implementation, and maintenance of our IT infrastructure. The ideal candidate will possess in-depth knowledge of Azure cloud services, networking protocols, and security best practices, and will have a proven track record of successfully managing and optimizing IT infrastructure.
Full Description	Main Responsibilities: •Primary resource making recommendations and proactively monitoring the environment's architecture and network technologies for capacity, throughput, performance, reliability/stability, and general operation of the technology. •Implements integrated network architecture for new computer systems and physical infrastructure by installing, configuring, and maintaining firewalls, routers, switches, LAN/WAN/Wireless internet and networks, Internet Service Providers, DNS, security certificates, antivirus/antimalware, VPN access and connectivity, advanced threat protection and remediating security vulnerabilities to provide a secure and reliable network infrastructure. •Architects, implements, and manages VoIP and telecommunications systems including video conferencing, PBX, instant messaging, call center, and other related services. •Participate in on-call rotation and provide escalated support in areas of network, security and communications. •Document the efforts of IT infrastructure disaster recovery scenarios, as it relates to system recovery, internet outages, and complete network disaster recovery scenarios, meeting requirements of Corporate One and regulatory agencies, especially in the context of designing these solutions. Desired Qualifications: •Bachelor's degree in Computer Science, Engineering, or related field (or equivalent experience). •7 years of experience in infrastructure engineering or related roles. •Prior knowledge of system and network infrastructure design with a broad range of server and networking technologies.

- Experience in managing technology infrastructure, cloud networks and data centers.

- Experience with multi-tenant/multi-site environments.

- Advanced experience in Microsoft Office 365 and Azure.
