Job Title	Software Engineer IV
Short Description	We are seeking a highly skilled and motivated Software Engineer IV to join our Information Technology team. This position will be involved in the entire development lifecycle including project planning, new code development, legacy codebase maintenance, testing, troubleshooting and internal support for custom applications.
Full Description	•Works closely with the Technical Delivery Manager, Business Analyst, and the Agile team to collaborate on proof of concepts, industrialization of the concepts, and the delivery of the concepts in a digital framework for quick release cycles to achieve a targeted minimal viable product (MVP). •Using modern technologies including web frameworks, SQL Server, Azure, low-code/no-code, iPaas and DevOps tools, designs and develops enterprise applications. Designs and develop business applications and system solutions including test plans, unit testing, safety and soundness testing, regression testing and system integration testing following enterprise architecture, design, and coding standards. •Fully supports and participates in all stages of the Agile methodology including daily standup, story planning, backlog grooming, deliverables, and demonstrations. Provides honest and critical feedback during all stages of the process to ensure better development practices and successful solution implementations. • Make recommendations to the team for environmental/architectural changes that will increase the stability or improve the performance of Corporate One's systems and applications. •Fully documents necessary aspects of the applications and processes for easy maintenance, transition, and governance needs. •Supports the company's in-house developed applications. Restores functionality to applications that have failed and documents resolutions. •Bachelor's degree in Computer Science, Engineering, or related field (or equivalent experience). •Strong practical knowledge of Agile/Scrum methodology. •3 years of related experience with enterprise application development and all phases of software development lifecycle. •4 years of experience with application software solution design and implementation.

•Hands on experience with Microsoft.Net, C#, ASP.NET, SQL Server, Azure, Web Services, REST or RESTful services.

•Experience with iPaaS/Enterprise Service Bus Integration Architecture, CSS, HTML, JQuery, JavaScript preferred.

Corporate One Federal Credit Union is committed to creating a diverse environment and is proud to be an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, disability, age, or veteran status.

As the financial landscape continues to evolve, so do we. That is why it is an exciting time to join our team! Please visit our website to learn more at www.corporateone.coop
