## Forida Credit Union Profile

Fist Quarter 2021 CUNA Economics \& Statistics

## Robust comeback

2021 started by registering the maximum number of daily Covid-19 infections we ever saw during the pandemic. The first two months were a continuation of the "wrong kind of surge" we described in our last update for 2020.

However, vaccination rollout, which began around the end of December, has inc reased signific a ntly throughout the quarter reaching 4 million doses perday at the end of March. This reversed the surge in daily infection numbers restoring the hope for retum to nomalcy.

States eased restrictions on activities following a decline in hospitalizations and death. This coupled with a third-round stimulus package of $\$ 1.9$ trillion injected into the economy lead to increased consumer and govemment spending resulting in a robust comeback for the economy.

Gross Domestic Product, which measures the value of all goods and services produced in the U.S., grew at 6.4 percent in the first quarter. This strong performance puts the a nnualized real GDP value at $\$ 19.1$ trillion, which is very close to the prepandemic maximum of $\$ 19.3$ trillion.

The U.S. unemployment rate decreased to 6.0 percent at quarter-end compared to 6.7 percent at year-end 2020. Forida's unemployment rate fell by four-tenths of a percentage point in the quarter, finishing the period at 4.7 percent - well below the national nom. Nationa lly, non-farm employment rose by 916,000 in March indicating more widespread economic openingsas pandemic fearseased. Even so, overall employment rema ins 8.4 million lower than pre-pandemic levels nationally.

The Federal Reserve federal funds effec tive rate ended the first quarter at 0.07 percent

showing a decline of two basis points over the three-month period. In contrast, the tenyear Treasury yield increased by 81 basis points to 1.74 percent by the end of the first quarter. The spread between the Fed's ovemight benchmark interest rate and the 10-year Treasury yield thus inc reased during the quarter - from 85 basis points at the start to 1.67 percent at the end of March. All else equal, that's good news for credit union net interest margins.

The S\&P 500 reflected ga ined signific antly during the first quarter with a 5.8 percent advance (i.e., over 23 percent a nnualized)

Month-End Values. Source: Standard \& Poors. compared to year-end 2020.

Total home sales (new and existing) decreased in the first qua rer continuing the declining trend observed during the fourth quarter of 2020. That reflects the fact that the average 30year fixed mortgage interest rate, inc reased from 2.81 percent to 3.17 percent during the first quarter. Sales also eased because pricescontinued to rise rapidly. The national FHFA purchase transactions price index increased by 3.5 percent in the first quarter and by 12.6 percent over the past year.
Forida home pric es essentially matched this with quarterly increases of 3.7 percent and 12.6 percent, respectively.

The first qua rer represented a tuming point in terms curtailing the pandemic due to expanded vaccination; and robust recovery
 of the economy as a result of the aggregate $\$ 5$ trillion relief stimulus spending, accommodative monetary policy, and partial lifting govemment restriction on economic activity. Despite the suc cessful gains, slower recovery of the job market and fears of rising prices remain a challenge.
U.S. credit unions reflected strong eamings, strong membership gains, fast (stimulus-induced) savings growth, a nd near-modem-day-record high asset quality. Loans grew, but only weakly so the loan-to-share ratio declined. Credit unions are awash in liquidity. Fast asset growth overwhelmed a big quarterly jump in ROA, which was reflected in a modest decline in the net worth ratio during the quarter.

## Forida credit union results generally mirror these national trends.

Sa vings growth for Florida credit unions was 7.8 percent in the first quarter of 2021, more than double the 3.4 percent growth during the December 2020 quarter. Loan growth increased 1.8

## Forida Credit Union Profile

percent during the quarter, a slight increase compared to the 1.5 percent growth at year-end. With savings growth outpacing loan growth by a wide margin, the loan to savings ratio for Florida credit unions declined from 75 percent at year-end 2020 to 70.9 percent at the end of March 2021.

In addition to high savings growth, other trends that stood out for Florida credit unions during the quarter were strong ea mings and improved asset quality. Florida credit unions reported an ROA of 99 basis points for the quarter, well over the 70 basis points reported at year-end 2020. Asset qua lity also improved with loan delinquencies and net chargeoffs declining to 0.29 percent and 0.33 percent, respectively.
U.S. credit union memberships inc reased 1.2 percent ( 4.8 percent a nnualized) in the first quarter of 2021. This is double the growth seen in the previous quarter and nearly fourteen times faster than U.S. population growth (which was recently reported to be 0.35 percent by the Census Bureau - a 120-yearlow). Total credit union memberships in March 2021 stood at 127 million.

In the aggregate, the movement's loan balancesgrew by only 0.3 percent in the first quarter ( 1.2 percent annualized). Year-over-year loan growth came in at 4.5 percent, which compared favorably to the banking sector - which reflected a 1.3 percent decline in loans overthe yearending March. We expect loan growth to accelerate in the coming quarters as the economy continues to open and consumers start spending to satisfy pent-up demand. CUNA forecasts loan growth rate to hit 5 percent at the end of 2021 before inching closer to the long-tem average of 8 percent - 10 percent in 2022.

Although the total loan growth rate is small relative to the previousquarter, there is a big variation in performance within the various loan portfolios included in the call report.

Commercial loans grew at 3.3 percent in the quarter (a nnualized 13.2 percent) topping the list. Used automobile loans followed with a quarterly growth of 1.3 percent ( 5.2 percent annualized). First mortgage loans reflected quarterly growth of 1.1 percent (4.4 percent a nnualized). Other unsec ured loans inc reased by 0.6 percent. Loans for new cars declined by 1.4 percent in the first quarter - in part reflecting supply cha in
 challenges. As is customa rily the case, members paid down credit card balances in the first quarter, with total outstandings 5 percent lower at the end of the three-month period. HEL a nd $2^{\text {nd }}$ mortgage loans are also down by 2.7 percent due to the combination of stimulus-induced debt reduction and refinancing first mortgages, which eliminated the second liens.

Total savings growth inc reased relative to the previous quarter continuing a strong trend. The American Rescue plan act was signed into law on March 11, which sent hundreds of billions in relief payments that were almost immediately directly deposited into financial institution

## Forida Credit Union Profile

accounts. Overall, credit union savings balances increased by 6.8 percent in the first quarter (a staggering 27.2 percent pace). Year-over-Year savings deposits increased by 23.1 percent.

This trend will undoubtedly ease as stimulus payments decline and aseconomic activity and consumers spending inc reases with declining Covid-19 infections. Still, CUNA's annualized savings forecast for 2021 is 15 percent (only modestly lower than the 20 percent advance experienced in 2020).

Share drafts inc reased 12.3 percent in the first quarter, an acceleration from fourth quarter results, which kept this segment of the funding portfolio at the top of the heap in terms of percentage gains for the second consecutive quarter. Regular shares and money market shares followed with una nnualized quarterly ga ins of 10.2 percent and 5.9 percent, respectively. IRA accounts increased 0.6 percent and certific ates declined by 3.1 percent.

The loan-to-savings ratio decreased in the quarter asexpected since loan growth is declining and saving is increasing. The ratio stood at 68.7 percent at the end of March, reflecting a 4.5 percentage point decline from the previous quarter.

All else equal, this represents a signific ant drag on credit union ea mings - since (on the margin) low-yielding investment portfolios will dominate asset growth putting downward pressure on net interest margins. Nationally, the credit union loan-to-sa vings ratio is likely to finish 2021 at about 67.1 percent before rising modestly in 2022.

Asset quality improved slightly compared to the previous quarter. Net chargeoff rates declined to 0.31 percent - a decline of 3 basis points over the quarter. Delinquencies finished the quarter at 0.45 percent decreasing by 14 basis points from the
 previous quarter. Bankruptcies per thousand credit union members held steady in the quarter at 1.1 but the aggregate number of banknuptcies percredit union reflected a slight decline.

Credit union eamings improved signific a ntly in the first quarter, with ROA jumping 21 basis points (annualized) relative to the fourth quarter of 2020. The 104 basis point bottomline result was the highest a nnualized quarterly ea mings rate in over 15 years. The result was powered by an 18 basis point decline in operating expenses, a 16 basis point decline in loss provisions, and a 12 basis point dec line in funding costs. In 2020, ROA totaled 70 basis points which was a 10yearlow.

CUNA forecasts that ROA will settle in close
 to 85 basis points for full-year 2021 and remain at that level in 2022. It will be diffic ult to repeat the result from the first quarter for the rest of the year due to rising interest ratestighter interest margins, slowing mortgage refinancings, and supply chain challenges in the auto market. Still, 85 ba sis points for 2021 is modestly higher than the long-run average ea mings rate.

The aggregate credit union net worth ratio declined due to very fast savings (hence asset) growth. The movement-wide average net worth ratio, which stood at 10.3 percent at the end of the fourth quarter last year, declined to 10.0 percent by the end of the first quarter. Overall, 93.8 percent of credit unions rema in well capita lized with net worth ratios over 7 percent.

Nationally, credit unions remain in generally good financial shape at the end of the first quarter and nearly all should have the wherewithal to continue to serve in meaningful ways as members struggle to make it through the continuing pandemic and financial challenges.

It is obvious that the economy is moving back to normal. Consumerspending, which represents the major portion of U.S. economic activity, is rebounding and boosting the recovery. However, we are watching two trends. Although there is tremendous progress in curtailing the impact of the COVID-19 crisis, emerging new virus variants and vaccine hesitation by some people indicate the fight is not over yet. Unfortunately, it's too early to say if the pandemic is in the proverbial rearview mirror.

The other conceming trend we are
 watching is inflation. There are glaring and widely-reported signs of increases in the general level of prices for goods and services and we expect continued pressure over the nearterm. At the moment, we believe that big price

## Forida Credit Union Profile

inc reases will be transitory - and that is supported by the bond market's implic it forecast for inflation reflected in demand for Treasury securities. Fed Chair Powell has been clear that monetary policy will be accommodative until the economy reaches full employment - and those most severely impacted by the COVID-19 crisis begin to see real progress in retuming to a semblance of normalcy.
